

Service Provider Council

A key resource for all members

Purpose

- The Service Provider Council is a leadership group that serves as a communication vehicle between the service provider network and Installnet. Council members are expected to represent the ideas and issues of the membership at large and to serve as a liaison to Installnet.

Membership

- The Council comprises of seven individuals, each serving a three-year term. Two or three members are elected at the Conference to keep fresh membership coming into a mature Council.
- New members are elected by the service providers at the Service Provider Conference using closed-ballot voting.
- Council members should be owners, principals, or key senior managers in their company.
- Installnet representation on the Council is not larger than the number of Council Members.
- Installnet may occasionally invite employee guest members to Council meetings/calls to add representation from staff positions.
- Council members may not miss two consecutive conferences or have over two unexcused phone conference calls in a calendar year.

Activities

- The Council has a conference call on the first Wednesday of each month. An agenda is distributed in advance and the Council rotates taking minutes.
- The Council members are assigned a group of service providers to communicate with during their term regarding new initiatives or challenges they are experiencing.
- Council members serve as mentors to service providers that are new to the Installnet network and encourage them to participate in Installnet programs and initiatives.
- Council members may be asked to chair committees and assist with event planning to promote the network's success.
