

Vince Cellini

Leadership Award

Installnet and the furniture installation community suffered a deep loss in 2005 with the untimely death of Installnet employee Vince Cellini.

Vince played a critical role in the company's early years, and we were extremely fortunate to have such a unique and dedicated employee on our team from the very first day of business. He was instrumental in developing the processes and standards that are still used today by our project managers and installers. Vince worked tirelessly to help a small business grow into the successful company it is today.

Vince was always professional, humble, and kind. A quiet leader, he was always fair, compassionate, and his integrity was never questioned. With his great sense of humor, Vince was a friend to everyone he met.

In memory of Vince and his contributions to our company, Installnet established the Vince Cellini Leadership Award in 2007. We are proud to recognize our 14th recipient at the Service Provider Conference to an individual who embodies the same outstanding qualities Vince possessed. We are proud to honor the memory of Vince in this way, and we look forward to presenting this distinguished award to a deserving individual.
