

# Service Provider Council

A key resource for all members

## Service Provider Council: Your Voice in the Network

The Service Provider Council is a group of leaders who help keep conversations flowing between Installnet and the wider service provider community. Council members bring ideas, discuss challenges, and act as a bridge to ensure everyone's voice is heard.

### Who Can Join?

The Council consists of Service Provider owners, principals, or senior managers who serve through two Conference cycles. Members are elected at the Service Provider Conference through a closed-ballot vote. Key Installnet representatives also attend the meetings and sometimes guests may join to share insights or different perspectives.

### What's Expected?

Members attend a monthly Council call where they can connect with other service providers, share updates, and help tackle challenges. Members may be asked to mentor new service providers, ensuring they feel supported in the network. In addition, the Council may take the lead on committees and help organize events that strengthen the network.

### Making an Impact

Being part of the Council is about shaping the future of the service provider network. Members play a key role in driving new initiatives, solving challenges, and making sure every provider has the tools and support they need to thrive.
